Northeastern University
Institute for Intelligent Networked Systems

Day 3 Intro

We're almost there!

Outline

- Agenda
- Hackathon scoring
- Q&A

Agenda for today

Time	Session
9:00–9:30	**Q&A on Day 2**
9:30–10:30	**Training 5: xDevSM – xApp Development (Enrichment) - part 1** How to create an xApp, including overview of the OSC RIC.
10:45–11:00	**Break**
11:00–12:00	**Training 5: xDevSM – xApp Development (Enrichment) - part 2** How to create an xApp, including overview of the OSC RIC.
12:00–13:00	**Hackathon – Session 3 (Final Development)** Final implementation, testing, and refinement. Code freeze at 17:00. Tutors available (at least one per team).
13:00–14:00	**Lunch**
14:00–17:00	**Hackathon – Session 3 (Final Development)** Final implementation, testing, and refinement. Code freeze at 17:00. Tutors available (at least one per team).
17:00–22:00	**Get your slides ready!**

Practicalities

- 6 teams
  - Coordinate with your team!
- There will be one tutor per team
  - Ask questions if you get stuck, if something doesn't work, etc

Day 3 Milestones

- Scheduler fully implemented and tested
- Evaluation runs completed on X5G
- Slides prepared

Hackathon Scoring

Prepare two slides

Slide 1 — What You Did & Results

- Approach: describe your scheduling algorithm and design choices
- Results: provide 2/3 plots
  - Throughput per UE
  - Latency: measured end-to-end delay distribution for ping
    - Highlight latency violations

Slide 2 — Open-Source Software & Research

- Why does open-source software matter for wireless research?
- How did tools like OAI, OpenRAN Gym, or X5G enable your work?
- What would have been harder — or impossible — without open platforms?
- Any contributions or improvements you'd consider feeding back upstream?

East Village has a large screen - consider trade off between visual information density and time to deliver slides

Hackathon Scoring

- **Deadline for slides: Wednesday 10pm**
  - Results should be ready by Wednesday ~5pm, then take care of slides
  - Send your slides on the team channel by 10pm and let me know who will present
  - Have your names in the first slide

Thursday Workshop

One person per group to present

	• Panelists: Howard Thomas (VIAVI), Tingjun Chen (Duke University), Richard Rouil (NIST), Vijay Shah (North Carolina State University)
3:00–3:15	**Break**
3:15–3:45	**Hackathon Review and Presentations**
3:45–4:30	**Panel 3: Open-Source Development and Testing: The Challenges with RAN Software** • Moderator: Michele Polese (Northeastern) • Panelists: Lincoln Lavoie (UNH IOL), Robert Schmidt (OpenAirInterface), Kirk Webb (University of Utah/POWDER), Peter Pacheco (MITRE), Damien Saucez (INRIA/SLICES)

Q&A

- Any questions?
- Any issues/blockers from yesterday?
